To : Janette@gmail.com
 From : Dalia@gmail.com
 Subject : The Great Pyramid
 Dear Janette,

I'm happy to send you this email to tell you about the Great Pyramid. The Pyramids of Giza were built during 2700-2500 B.C. The Great Pyramid is the largest one. It was built for Pharaoh Khufu and it is 450 feet high. One hundred thousand people worked on it for three months each year. This was the time of the Nile's annual flood which made it impossible to farm the land. Most people were not working at this time of the year and this was a good chance for them to find work. The king saved good food and clothing for his workers and was kindly remembered in folk tales for many centuries. The Great Pyramid itself is truly an amazing work of engineering for over four thousand years; it was the tallest building in the world. How about visiting Egypt next holiday to see the Great Pyramid at Giza?

Yours,
 Dalia

To : Ali
From : Ahmed
Subject : Dangers of smoking
Dear Ali,

I'm very happy to write this email to you. I would like to talk about smoking. Smoking is very bad for your health. The tobacco in cigarettes contains dangerous chemicals. It makes you ill. Smoking damages your lungs and you cannot breathe well. People who smoke can't run or breathe well. Also, they can't do many jobs. Smoking can make people's fingers and teeth yellow, too. People who start smoking find it very difficult to stop, because their bodies need the tobacco. Cigarettes are very expensive, too. Smoking pollutes the environment. We should all help keep the environment clean because we all live in it. So people should do some sports. We should help them give up smoking.

Yours,
Ahmed

To : Hany
 From : Adam
 About : My visit to Helwan Observatory last week
 Hi Hany,

I'd like to tell you about an interesting visit last week. I visited Helwan Observatory. I could see space. I saw some planets. There are eight planets in the solar system. They are all different sizes. The biggest planet is 1,000 times bigger than earth. Three of the planets are smaller than earth. Only two planets in the solar system don't have any moons, but one planet has 62 moons and one has 67! The earth's moon is round, but many of the other moons are different shapes and sizes. When the sun shines on the moon, it's very hot.

It's around 123 degrees. The side of the moon that isn't in the sun is freezing, at around minus 153 degrees! The solar system is amazing. I had a good time there.

Yours,
 Adam
