B Reading Comprehension

3 Read the following, then answer the questions:

Bike catchers are people who take bikes from canals in Amsterdam, a city in Europe. There are no hills in the city so a lot of people cycle to school and to work. In fact, thirty percent of people in Amsterdam travel to work by bike. The city also has a lot of canals and sometimes the bikes fall into the water. Perhaps this is because there are more bikes in the city than people! In the 1960s, there were so many bikes in the canals that they began to damage the bottom of boats. That is when the job of bike catchers began. One bike catcher told me that they take 14.000 bikes out of the canals each year. People used to see different kinds and colours of bikes there.

A) Answer the following questions:

Bees live in a house that is called a hive. There are three kinds of bees: workers, male bees, and queens. Only one queen bee can live in each hive. If she is lost or dead, the other bees will stop their work. Bees are very wise and busy little animals. They all work together to build cells of wax for their honey. Each bee takes its proper place and does its own work. Some go out and gather honey from the flowers; others stay at home and work inside the hive. The cells which they build are all of one shape and size, and they have six sides. But the male bees do not work. Before winter comes, all of them are driven from the hive so that they don't eat the honey which they did not gather.

3 Read the following, then answer the questions:

Have you ever heard of the killer whale? Killer whales live in oceans all over the world. They are found mostly in the Arctic and Antarctic oceans, where the water is cold. However, Killer whales have been seen in warmer waters. How do they differ from other whales? One way is in their colouring. A killer whale has the colour of black and white. Killer whales have a smooth body form. Killer whales are typically 19–22 feet long and can weigh anywhere from 8,000 to 12,000 pounds. They get their name for a reason. They eat almost any kind of sea animal including sea lions, fish, squid, sea turtles, and others. They are the fastest swimming sea mammals. This speed makes it easy for them to hunt. They often hunt in groups. This improves their chances of catching a prey.

B Reading Comprehension

3 Read the following, then answer the questions:

On July 20, 1969, Neil Armstrong and Buzz Aldine were the first people to walk on the moon. They and other astronauts have taken moon rocks to study from their trips to the moon. Scientists found that the moon rocks are similar to the rocks on earth. Moon rocks are about 4 billion years old. Most scientists think the moon was made after the earth hit something in space. A large part of the earth broke off and that became the moon. Scientists think this happened 60 million years after the earth was formed. If you stood on the moon, the sky would look dark even in the daytime! That is because there is no air or atmosphere. There is also no sound because sound waves go through the air. The moon is silent. There is no wind, rain or any other type of weather on the moon.

A) Answer the following questions:

1 What does the passage tell us about?

.....

B Reading Comprehension

3 Read the following, then answer the questions:

Horses are beautiful animals. They can be of different colours, and can run quickly. People like to watch horses because they are strong and powerful. The mother horse generally has one baby in the spring, and feeds the baby milk. Horses have long legs, and big eyes that can see almost all the way around them. Horses can live up to 20 or 25 years. Sometimes people can tell how old a horse is by looking at its teeth! They generally sleep standing up, so that if an animal attacks them, they can run away quickly. They only need about three hours of sleep per day! As for food, horses eat foods such as grass, hay, oats, corn, apples, and carrots. When these strong creatures are treated with care, they make wonderful friends.
